ANGELIM AMARGOSO

Great stability and competitive value for outdoor projects

- **Scientific name:** *Vatairea spp.*
- **Density:** 710–950 kg/m³
- **Durability:** High – natural resistance to fungi and termites
- **Available in:** Deck, underdeck and rough sawn
- **Recommended applications:** Decking, outdoor structures, fencing, and pergolas
- **Surface finish:** Smooth, uniform texture with occasional dark veins

CUMARU

Timeless strength, tropical beauty

- **Scientific name:** *Dipteryx odorata*
- **Density:** 1,000–1,200 kg/m³
- **Durability:** Very high – suitable for intense outdoor use
- **Available in:** Deck and rough sawn
- **Recommended applications:** Premium decking, heavy-duty flooring, marine structures
- **Surface finish:** Rich oily surface, interlocked grain with a golden-brown to reddish tone
- **CITES:** Listed under CITES Appendix II

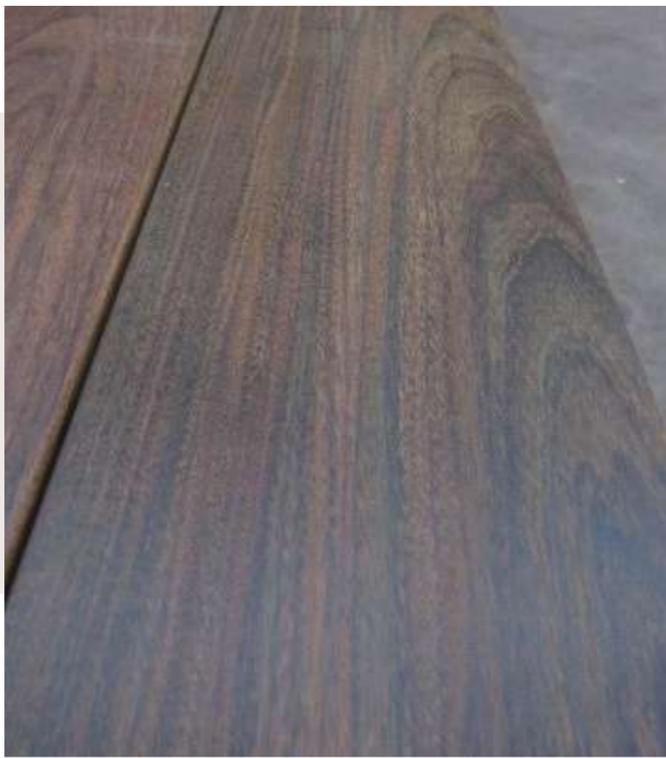

RED CUMARU

Strength in every fiber

- **Scientific name:** *Dipteryx odorata*
- **Density:** 1,050–1,200 kg/m³
- **Durability:** Exceptional – extremely resistant to decay, insects, and harsh climates
- **Available in:** Deck and rough sawn
- **Recommended applications:** Heavy-duty decking, exterior structures, premium flooring, bridges, and boardwalks
- **Surface finish:** Rich reddish-brown tones with fine interlocked grain, delivering a warm, elegant look that deepens with age
- **CITES:** Listed under CITES Appendix II

IPE

The gold standard in tropical hardwood

- **Scientific name:** *Handroanthus spp.*
- **Density:** 1,050–1,300 kg/m³
- **Durability:** Extremely high – resistant to weather, insects, and wear
- **Available in:** Deck and rough sawn
- **Recommended applications:** Luxury decking, docks, boardwalks, architectural exteriors
- **Surface finish:** Smooth with tight grain and high natural luster
- **CITES:** Listed under CITES Appendix II

- **Scientific name:** *Mezilaurus itauba*
- **Density:** 850–950 kg/m³
- **Durability:** High – resistant to decay and termites
- **Available in:** Deck and rough sawn
- **Recommended applications:**
Decking, pergolas, facades, outdoor furniture
- **Surface finish:**
Satin sheen with striking grain contrast and natural oiliness

ITAUBA

Warm tones with bold personality

GARAPA

Bright, clean, and impressively durable

- **Scientific name:** *Apuleia leiocarpa*
- **Density:** 790–850 kg/m³
- **Durability:** High – long-lasting even in exposed settings
- **Available in:** Deck, underdeck and rough sawn
- **Recommended applications:** Decking, cladding, pool surrounds, furniture
- **Surface finish:** Smooth golden surface with low grain variation

MUIRACATIARA

TIGERWOOD - Exotic grain that commands attention

- **Scientific name:** *Astronium spp.*
- **Density:** 900–1,000 kg/m³
- **Durability:** High – natural resistance to moisture and decay
- **Available in:** Deck and rough sawn
- **Recommended applications:** Indoor flooring, statement walls, luxury decking
- **Surface finish:** Bold grain patterns with polished texture and deep contrast

JATOBA

BRAZILIAN CHERRY- Warmth and richness with long-term performance

- **Scientific name:** *Hymenaea courbaril*
- **Density:** 950–1,200 kg/m³
- **Durability:** High – very resistant to impact and insects
- **Available in:** Deck and rough sawn
- **Recommended applications:** Indoor flooring, high-end decking, premium furniture
- **Surface finish:** Fine grain with reddish-brown glow and excellent polishability

MASSARANDUBA

Trusted resilience for demanding environments

- **Scientific name:** *Manilkara spp.*
- **Density:** 1,000–1,100 kg/m³
- **Durability:** Very high – ideal for structural and outdoor use
- **Available in:** Deck and rough sawn
- **Recommended applications:** Public decking, bridges, benches, boardwalks
- **Surface finish:** Dense and smooth, uniform reddish tone with moderate sheen

PURPLE HEART

Distinctively bold, naturally elite

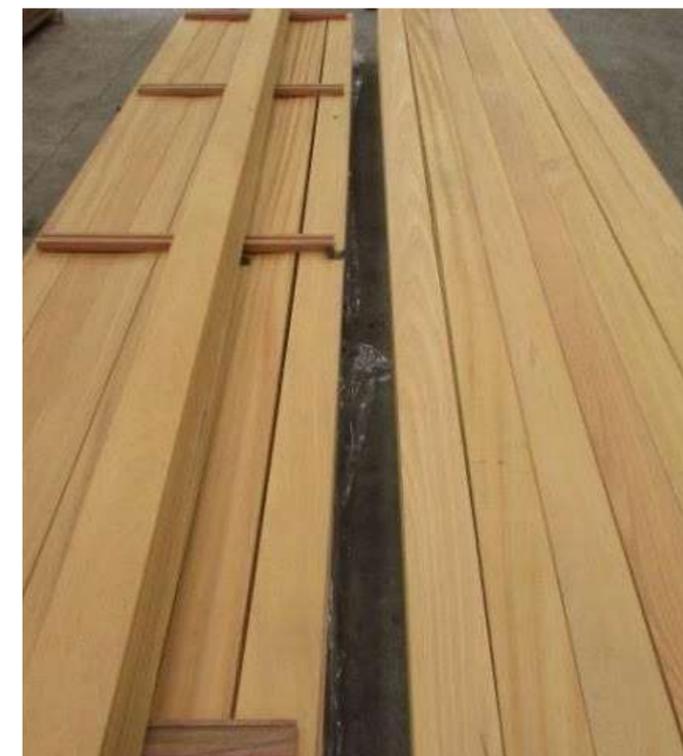

- **Scientific name:** *Peltogyne spp.*
- **Density:** 900–1,100 kg/m³
- **Durability:** High – excellent resistance to wear and insects
- **Available in:** Deck and rough sawn
- **Recommended applications:** Accent decking, designer interiors, artisanal builds
- **Surface finish:** Vibrant purple hues that deepen with age, high-end natural gloss

TATAJUBA

Golden resilience, built to last

- **Scientific name:** *Bagassa guianensis*
- **Density:** 800–950 kg/m³
- **Durability:** High – excellent resistance to decay, termites, and marine borers
- **Available in:** Deck and rough sawn
- **Recommended applications:** Outdoor decking, marine construction, heavy-duty flooring, exterior joinery
- **Surface finish:** Smooth texture with golden-brown tones that darken beautifully over time

TEAK

Elegance and endurance

- **Scientific name:** *Tectona grandis*
- **Density:** 650–1,750 kg/m³
- **Durability:** Exceptional – naturally resistant to water, decay, and pests
- **Available in:** Deck and rough sawn
- **Recommended applications:** Yacht decks, outdoor furniture, premium flooring, luxury joinery
- **Surface finish:** Rich golden to dark brown with straight grain and natural oils for a lustrous, smooth finish

QUALITY ASSURANCE

Excellence starts with the people who guarantee it
